

1. Grip the handle, (do not squeeze the trigger as this will grip and lock the rod)
2. Pull back the rod, grabbing at ladder hook, make sure to pull evenly to avoid binding.
3. Place tip of cartridge in spout cutter, cutting at angle, depth of cut determines width of bead.
4. Use Seal Puncture tool insert into nozzle piercing the foil packaging.
5. Place Cartridge in gun, place Nozzle in EZ-Load front cap.
6. Squeeze front trigger to advance the rod.
7. Once released the Drip-Free clip will grip the rod and retract it, to reduce the drip from nozzle.
